

Project No. 5.1.1.2.i.0/2/24/A/CFLA/008 "Support for research by the Mechanical Engineering Competence Centre " SIA VIC TEC research project No. J.3.1. **"Prototype of an unmanned surface vehicle – water drone (USV) prototype with adapted torpedoes and air defense system elements"** (hereinafter – the Project) has been launched and the following activities have been implemented.

The project was launched on March 3, 2025.

Project implementation from March 3, 2025 to May 31, 2025.

During this period, initial research work on the effectiveness and technical parameters of available protection systems was carried out as planned. The possibilities for adapting them to the prototype software were explored.
